PROFESSIONAL SUMMARY

IT Operation analyst and NOC Analyst with 3+ years monitoring enterprise network infrastructure, resolving incidents, and supporting end users in fast-paced, 24/7 operations. Skilled in network monitoring (OpManager, Site24x7), IT service management with BMC Remedy, and cross-team knowledge transfer. Bachelor's degree in Computer Engineering with a strong foundation in networking, programming, and web technologies. Currently pursuing CCNA, CompTIA, and ITIL certifications.

CORE SKILLS

Monitoring & NOC Tools: OpManager, Site24x7, BMC Remedy, Network Monitoring & Alerting, Incident Escalation

IT Service Desk: Ticketing Systems, Incident & Request Management, User Account Administration, SLA Compliance

Networking: TCP/IP, Network Troubleshooting, Cisco Packet Tracer, Windows Server, Linux

Programming & Web: C, C++, Python, MATLAB, HTML, CSS, JavaScript, PHP, Laravel, SQL

Platforms & Tools: Microsoft 365 Administration, Windows, Linux, Git, VS Code

Languages: Native Arabic & Fluent English

PROFESSIONAL EXPERIENCE

IT Operation Analyst & NOC Analyst – CNS, Dubai, UAE

Sep 2023 – Present

- Monitor enterprise network infrastructure in real time using **OpManager** and **Site24x7**, identifying and escalating outages and performance issues before they impact end users.
- Log, track, and resolve incidents and service requests through **BMC Remedy**, maintaining accurate documentation and meeting SLA targets.
- Led a knowledge transfer initiative for MOHAP NOC monitoring, training two team members on monitoring procedures and escalation workflows under management oversight, ensuring continuity of 24/7 coverage.
- Provide technical support across multiple channels for software and network-related issues, minimizing downtime for end users.
- Manage user accounts, access permissions, and IT service requests across enterprise systems.
- Collaborate with cross-functional IT teams to identify root causes and implement improvements to system reliability and user experience.

Helpdesk Intern – Casper Computer, Ajman, UAE

Mar 2023 – Sep 2023

- Provided technical support for hardware and software issues across desktop and laptop systems.
- Installed, configured, and maintained software applications, ensuring stable performance for end users.
- Diagnosed and repaired system malfunctions, including hardware replacements and software fixes.

Web Development Intern – Analytica FZE, Dubai, UAE

Sep 2022 – Mar 2023

- Developed front-end and back-end features using HTML, CSS, JavaScript, PHP, Laravel, and SQL.
- Collaborated with senior developers on full-stack solutions and participated in debugging and testing.

EDUCATION

Bachelor of Computer Engineering – Ajman University, UAE

2019 – 2023

- Strong foundation in programming and object-oriented design using C, C++, Python, and MATLAB.
- Networking fundamentals including TCP/IP and network simulation using Cisco Packet Tracer; hands-on experience with Windows Server, Linux, and Git.
